

Rename Dialogs

Refactor | Rename

The **Rename** dialogs let you perform the [Rename refactoring](#) for various entities such as classes, fields, methods, packages, etc. You can select where the changes to occurrences of the entity name are required and where not.

- [Rename Dialog for a Class or an Interface](#)
- [Rename Dialog for a Directory](#)
- [Rename Dialog for a Field](#)
- [Rename Dialog for a File](#)
- [Rename Dialog for a Method](#)
- [Rename Dialog for a Package](#)
