

Rerunning Applications

You can re-run an application if its tab is still opened in the [Run](#) window. The program re-runs with the initial settings.

To re-run an application

1. In the **Run** window, select the tab where the desired application is opened.
2. In the toolbar of the **Run** window, click the **Rerun** button , or press **Ctrl+F5**.

If you want to re-run an application without losing focus in the editor tab you are working in, press **Shift+F10**.
