

Run/Debug Configuration: ColdFusion

A *ColdFusion* run/debug configuration enables you to deploy and run applications on the [ColdFusion](#) server.

Click [here](#) for the description of the options that are common for all run/debug configurations.

| Item | Description |
|----------|---|
| Web Path | In this text box, specify the URL address that corresponds to the server root. The server side of deployment mappings will be specified relative to this URL. |
| Browser | In this drop-down list, specify the Web browser to open the application in. The list shows all the Web browsers configured in the IDE . |

Toolbar

| Item | Shortcut | Description |
|---|--------------------|--|
|  | Alt+Insert | Click this button to add new configuration to the list. |
|  | Alt+Delete | Click this button to remove the selected configuration from the list. |
|  | Ctrl+D | Click this button to create a copy of the selected configuration. |
|  | Edit defaults | Click this button to edit the default configuration templates. The defaults are used for the newly created configurations. |
|  | Alt+Up or Alt+Down | Use these buttons to move the selected configuration or group of configurations (folder) up and down in the list. The order of configurations or folders in the list defines the order, in which configurations appear in the Run/Debug drop-down list on the main toolbar. |
|  | | Use this button to create a new folder . If one or more run/debug configurations have the focus, then the selected run/debug configurations are automatically moved to the newly created folder. If only a category has the focus, then an empty folder is created. Move run/debug configurations to a folder using drag-and-drop, or  buttons. |

Common options

| Item | Description |
|----------|--|
| Name | In this text box, specify the name of the current run/debug configuration. This field does not appear for the default run/debug configurations. |
| Defaults | This node in the left-hand pane of the dialog box contains the default run/debug configuration settings. Select the desired configuration to change its default settings in the right-hand pane. The defaults are applied to all newly created run/debug configurations. |

| Item | Description |
|-------|--|
| Share | <p>Select this check box to make the run/debug configuration available to other team members.</p> <p>If the directory-based project format is used, the settings for a run/debug configuration are stored in a separate xml file in the <code>.idea\runConfigurations</code> folder if the run/debug configuration is shared and in the <code>.idea\workspace.xml</code> file otherwise.</p> <p>If the file-based format is used, the settings are stored in the <code>.ipr</code> file for shared configurations or in the <code>.iws</code> file for the ones that are not shared.</p> <p>This check box is not available when editing the run/debug configuration defaults.</p> |

| Item | Description | |
|---|---|---|
| Before launch | Specify which tasks should be carried out before starting the run/debug configuration. The specified tasks are performed in the order that they appear in the list. | |
| | Item | Keyboard shortcut |
| | | Description |
| | + | Alt+Insert |
| - | Alt+Delete | Click this icon to remove the selected task from the list. |
|  | Enter | Click this icon to edit the selected task. Make the necessary changes in the dialog that opens. |

| Item | Item | Keyboard shortcut | Description Description |
|------|----------------|-------------------|--|
| | ↑ | Alt+Up | Click this icon to move the selected task one line up in the list. |
| | ↓ | Alt+Down | Click this icon to move the selected task one line down in the list. |
| | Show this page | | Select this check box to have the run/debug configuration settings shown prior to actually starting the run/debug configuration. |
