

Running

This section describes the procedures that are common for the various types of applications:

- [Creating and Editing Run/Debug Configurations](#)
- [Creating and Saving Temporary Run/Debug Configurations](#)
- [Creating Folders and Grouping Run/Debug Configurations](#)
- [Running Applications](#)
- [Rerunning Applications](#)
- [Reviewing Results](#)
- [Stopping and Pausing Applications](#)
- [Setting Configuration Options](#)
- [Setting Log Options](#)

For the details related to running applications in the supported frameworks, refer to [Language and Framework-Specific Guidelines](#)
