

# Save Project as Template Dialog

---

Tools | Save Project As Template

Specify the settings for the template that you are creating.

Item	Description
Save	<p>If the project that you are saving as a template contains more than one module, you can select to create a template for the whole project, or to include only for one of the modules in the template. So select <b>&lt;whole project&gt;</b> or the name of the corresponding module.</p> <p>This option is not available if your project contains only one module.</p>
Name	Specify the name of the template.
Description	<p>Type the template description.</p> <p>You can enclose text fragments between <code>&lt;b&gt;</code> and <code>&lt;/b&gt;</code>, and <code>&lt;i&gt;</code> and <code>&lt;/i&gt;</code> to make the corresponding fragments bold or italicized. For example:</p> <p>A project with a <code>&lt;b&gt;Java&lt;/b&gt;</code> module and support for <code>&lt;i&gt;Web development&lt;/i&gt;</code> and <code>&lt;i&gt;Tomcat&lt;/i&gt;</code>.</p>
Replace parameters with placeholders	If you select this check box (recommended), you will have additional options when creating a new template-based project or module. For example, you will be able to specify the base Java package and an application server different from the ones defined in the current project.
