

# SDKs. IntelliJ IDEA

File | Project Structure | SDKs |  IDEA SDK

Ctrl+Shift+Alt+S

Use this page to specify the settings related to the IntelliJ IDEA Plugin SDK. (This is an SDK type for [IntelliJ IDEA plugin development](#).)

Configure the paths to the [class files](#), [sources](#), [external annotations](#) and documentation.

Item	Description
Name	Use this field to edit the name of the SDK.
IntelliJ IDEA Plugin SDK home path	Specify the IntelliJ IDEA Plugin SDK home directory. Actually, this is the IntelliJ IDEA installation directory. Use  (Shift+Enter) to select the SDK installation directory in the <b>Select Home Directory for IntelliJ IDEA Plugin SDK</b> dialog.
Sandbox Home	Specify the sandbox directory, where IntelliJ IDEA will deploy plugins. Use  (Shift+Enter) to select the necessary directory in the <b>Sandbox Home</b> dialog.
Internal Java Platform	Select the internal Java SDK. (The JDK version 1.6 is recommended.)
 (Alt+Insert)	Use this icon or shortcut to add one or more files and/or folders to the list. In the <a href="#">dialog that opens</a> , select the necessary files and/or folders and click OK.
 (Alt+Delete)	Use this icon or shortcut to remove the selected items from the list.
 (Alt+S)	For documentation: To be able to use external documentation available online, click this icon and specify the URL of the external documentation in the dialog that opens.
