

SDKs

File | Project Structure | SDKs

When you select **SDKs** in the left-hand pane of the **Project Structure** dialog, the SDKs defined in IntelliJ IDEA are shown. So you can add and remove SDKs, look for their usages in the project as well as manage their settings.

- [Managing SDK settings](#)

Adding and removing SDKs. Looking for SDK usages

The corresponding functions are accessed by means of the toolbar icons (shown in the *Icon* column). Alternatively, context menu commands (accessed by right-clicking an SDK in the list; listed in the *Command* column) or keyboard shortcuts (the *Shortcut* column) may be used.

Icon	Command	Shortcut	Description
	Add new SDK	Alt+Insert	Use this icon, command or shortcut to add a new SDK. Select the necessary SDK type . Then, in the dialog that opens , select the SDK home directory and click OK .
	Delete	Delete	Use this icon, command or shortcut to remove the selected SDKs from the list.
	Find Usages	Alt+F7	Use this icon, command or shortcut to look for the usages of the selected SDK in the project.

Managing SDK settings

The settings for the selected SDK are shown in the right-hand part of the dialog on the **SDK** page. These settings depend on the [SDK type](#).

- [SDKs. Flex](#)
- [SDKs. Flexmojos SDK](#)
- [SDKs. Java](#)
- [SDKs. IntelliJ IDEA](#)
