

## Select Accessor Fields to Include in Transfer Object

EJB Tool Window | context menu of an entity bean | New | Transfer Object

Use this dialog box to select methods to be included in a transfer object for an entity bean.

Item	Tooltip	Description
		Use this button to have methods sorted in the ascending or in the descending order.
	Show Classes	If a bean refers to ancestor classes, clicking this button reveals these classes and their members. Otherwise, the button is not available. <div style="border: 1px solid #ccc; padding: 5px; margin-top: 10px;">This functionality depends on the EJB specification.</div>
	Expand All	Click this button to have all nodes expanded.
	Collapse All	Click this button to have all nodes collapsed.
List of members in the entity bean in question		From the list, select the desired methods. Use the Ctrl and Shift keys for multiple selection.
Transfer object class name		In this field, specify a name for a transfer object class that matches a certain pattern. Accept the name suggested by IntelliJ IDEA or change it as required.
Generate getter/setter in <class name> interface		Select these check boxes to have accessor methods for the selected fields generated. You can accept the suggested names of the accessor methods or change them as required.
Copy JavaDoc		Select this check box to have a JavaDoc comment to the generated transfer object included, if any.
