

Select Android Virtual Device Dialog

[Tools | Run](#)

[Tools | Debug](#)

[Run | Edit Configurations - Configuration](#)

The dialog box opens when you click the **Launch Emulator** button in the [Choose Device](#) dialog box or the **Browse** button  next to the **Prefer Android Virtual Device for Deployment** drop-down list in the [Run/Debug Configuration: Android](#) dialog box.

The dialog box shows a list of all the currently available emulators.

Use this dialog box to appoint a virtual device to launch upon the future session start-up with the configuration being specified or right now during the current session.

Item	Description
Name	This read-only field shows the names of existing virtual devices.
Target	This read-only field shows the build target specified for the virtual device.
APILevel
