

Select Repository to Clone Dialog

VCS | Checkout from Version Control | GitHub

Use this dialog box to choose the source remote repository, the folder to clone the source to, and the name of the project to be created around the cloned data.

Item	Description
Repository	From this drop-down list, select the source repository to clone the data from.
Parent Directory	In this text box, specify the directory where the local repository for cloned sources will be created. Type the path to the directory manually or click the Browse button  and choose the desired directory in the Select project destination folder dialog box that opens.
Directory Name	In this text box, specify the name of the folder where the repository will be created based on the cloned sources.
Clone	Click this button to start cloning the sources from the specified remote repository.
