

Selecting Components

To select one or more components

To select a single component, just click it. To select multiple components, do one of the following:

- In the [Components Treeview](#), or in the [Form Workspace](#), use Shift+Click to select multiple contiguous components, or Ctrl+Click for multiple non-contiguous components.
- Use arrow keys to move selection to the adjacent component.
- Use Shift+Arrow keys to select multiple contiguous components.
- Use `GuiDesigner.ExpandSelection` and `GuiDesigner.ShrinkSelection` to expand or shrink selection within a container.
