

Set Property Dialog (Subversion)

VCS | Subversion | Set Property

Use this dialog to define SVN-specific properties for the files and folders under SVN version control (ignore list, externals etc.)

Item	Description
Property name	Enter custom property name in the text field, or use the drop-down list to select one of the pre-defined properties.
Set property value	Click this radio-button to set value for the specified property name in the text area. Properties that accept multiple values, such as an ignore list, can be entered on multiple lines.
Delete property	Click this radio-button to remove selected property from the list.
Update properties recursively	Check this option, if you want to apply the property to every file and directory under the selected directory.
