

Share Project on GitHub Dialog

VCS | Import into Version Control | Share Project on GitHub

Use this dialog box to create a repository on the GitHub remote storage and publish your project sources there.

Item	Description
New repository name	In this text box, type the name of the repository to be created. By default, IntelliJ IDEA suggests the name of the current project.
Description	In this text box, describe the main functionality implemented in the project.
Private	Select this check box to suppress access to the repository for other users. <div style="border: 1px solid orange; padding: 5px; margin-top: 10px;">The check box is disabled for free accounts.</div>
Share	Click this button to have IntelliJ IDEA initiate repository creation and afterwards upload the project sources to the new repository.
