

## Skeleton Generator

---

Use this page to enable and configure the use of the [Skeleton Generator](#) tool in IntelliJ IDEA.

Item	Description
Use Skeleton Generator	When this check box is selected, the Skeleton Generator tool is available for generating test stubs in the project and the <b>Generate PHPUnit test</b> command is added to the context menu of PHP files in the <a href="#">Project</a> tool window.
Path to phpunit-skelgen	In this text box, specify the <code>phpunit-skelgen</code> parent folder in the text box below. Most likely, it is the <code>PEAR</code> folder. Type the path manually or click the <b>Browse</b> button  and select the desired folder in the <a href="#">dialog that opens</a> .
Use bootstrap file	Select this check box to have a specific PHP script always executed before launching the Skeleton Generator tool and specify the location of the script in the <code>.</code> . Type the path manually or click the <b>Browse</b> button  and select the desired folder in the <a href="#">dialog that opens</a> .
