

Status Bar

IntelliJ IDEA status bar indicates the current IDE state and lets you carry out certain environment maintenance tasks.

Icon	Description
	Click to toggle showing or hiding tool window bars. Also double press and hold Alt to show hidden tool window bars. Refer to the procedure description .
Load offline inspection results	Shows description of a command, currently selected on the main menu, context menu, or a toolbar.
	Click this icon to invoke the Background Tasks manager .
48:82 48:82/17	The first two numbers denote the current caret position in the editor(line and column). If a selection is made in the editor, IntelliJ IDEA shows the length of the current selection after slash.
	Lock icon indicates the read-only or writable attribute of the current file in the editor. Click the icon to toggle file attribute. <div style="border: 1px solid gray; padding: 5px; margin-top: 10px;">Use also File Make File Writable/Read-only command on the main menu.</div>
Insert Overwrite	Indicates whether the new characters in the editor overwrite the existing ones. In the <i>Overwrite</i> mode, the form of the cursor changes to a rectangle. Press the Insert key to toggle the <i>Insert</i> and <i>Overwrite</i> modes.
CRLF ↕	View and change line endings of the current file in the editor.
windows-1251	View and change encoding of the current file in the editor.

Icon	Description
	<p>Hovering your mouse pointer over the icon shows the current code inspection profile at the tooltip.</p> <p>Clicking the <i>Hector</i> icon results in showing a dialog box with the following functions:</p> <ul style="list-style-type: none"> Highlighting level. Use the slider to change highlighting level for the current file, or configure inspection profile. <p>Depending on the highlighting level selected by the slider, Hector keeps an eye on the code  (Inspection level), turns half face  (Syntax), or averts his face from the code  (None).</p> Power Save Mode. Select this check box to minimize power consumption of your computer on account of eliminating the background operations. <p>When <i>Power Save Mode</i> is on, IntelliJ IDEA reduces its functionality to the one of a text editor, by not executing expensive background activities that drain laptop battery. These activities include error highlighting and on-the-fly inspections, autopopup code completion , and automatic incremental background compilation .</p> <p>Hector fades .</p> <div style="border: 1px solid #ccc; padding: 5px; margin: 10px 0;"> <p>You can also toggle Power Save Mode on the main menu (File Power Save Mode).</p> </div> Import popup. Use this check box to enable or disable auto-import for the current file. You can turn auto-import off for the whole product in the Auto Import page of the Settings dialog.
	<p>Click this icon to navigate to the pending source control changelists in the Incoming tab of the Changes tool window.</p>
	<p>Shows the current heap level and memory usage. Visibility of this section in the Status bar is defined by the Show memory indicator check box in the Appearance page of the Settings dialog.</p> <p>Click the memory indicator to run the garbage collector.</p>
	<p>Shows logged in to or logged out from IntelliJ Configuration Server status. Click to show the IntelliJ Configuration Server Settings dialog box.</p> <p>This is only available upon installing the IntelliJ Configuration Server plugin.</p>

More icons appear in the Status bar as you download and install plugins.
