

Supported Compilers

Currently IntelliJ IDEA supports the following Java compilers:

- [Javac](#). This compiler is taken from the Java [SDK](#) currently assigned to the project.
- [Eclipse](#). IntelliJ IDEA comes bundled with the Eclipse compiler.
- [Ajc](#) . This compiler is not included in IntelliJ IDEA distribution and should be downloaded separately. Note that to able to use this compiler, the AspectJ Support plugin should be [enabled](#).

Besides that, IntelliJ IDEA supports compilers for [Flex](#), [Groovy](#), [Android DX](#). The corresponding plugins should be [enabled](#).
