

Switching Between Schemes

You can quickly switch between various color schemes, keyboard layouts, and look-and-feels without actually invoking the corresponding page of the [Settings](#) dialog box.

To switch between schemes

1. Choose **View | Quick Switch Scheme** on the main menu or press **Ctrl+Back Quote**.
2. In the pop-up window that opens select the desired scheme (Colors and Fonts, Code Style, etc.).

3. In the suggestion list, click the desired option.
