

Symfony

File | Settings | Command Line Tool Support

The dialog box opens when you click the **Add** button and choose **Symfony** in the **Choose Tool to Add** dialog box.

Use the dialog box to configure [Symfony](#) support in IntelliJ IDEA.

Item	Description
Path to Symfony	<p>In this text box, specify the location of the Symfony executable file:</p> <ul style="list-style-type: none">■ <code><symfony_home>/data/bin/symfony</code> for Symfony 1.2.■ <code><symfony_home>/data/bin/symfony.bar</code> for Symfony 1.4.■ <code><symfony_home>/app/console</code> for Symfony 2. <p>Type the path manually or click the Browse button  and choose the desired location in the dialog that opens. IntelliJ IDEA parses the contents of the specified file for Symfony commands.</p>
