

Table Editor Properties Dialog

To access this dialog, do one of the following in the [Table Editor](#):

- Click **Properties** on the toolbar.
 - Choose **Properties** on the context menu of a table.
-

The dialog box contains the following tabs:

- **General**. Use this tab to specify the number of records per page.
- **Data Export**. Use this tab to define the data export format.

General tab

Item	Description
Page Size	Type the maximum number of records to display per page. To set unlimited page size, type zero.

Data Export tab

Item	Description
String Quotation	Type the symbols that should be used to enclose the exported string values.
Values Separator	Type the symbol to be used to separate exported values.
Include Table Header	Select this check box to include the table header (column names) in exported data.
Include Row Number	Select this check box to have the row numbers included in exported data.
