

# Tapestry Tool Window

---

This tool window shows contextualized information about some *Tapestry* element.

## Documentation

This tab shows the documentation of a Tapestry component, page or mixin.

The documentation (where applicable) is composed of:

- General description
- List of required parameters (with their name, prefix, default value and description)
- List of optional parameters (with their name, prefix, default value and description)
- List of artifacts
- Examples
- Notes

When the element selected is not a Tapestry component, page, or mixin, the documentation is composed of:

- List of Tapestry Applications
- List of Core Library components, pages and mixins
