

Testing

IntelliJ IDEA provides support for several language-specific [testing frameworks](#). This section covers the issues that are common for all the supported testing frameworks:

- [Configuring Testing Libraries](#)
- [Creating Tests](#)
- [Creating Test Methods](#)
- [Creating Run/Debug Configuration for Tests](#)
- [Performing Tests](#)
- [Monitoring and Managing Tests](#)
- [Viewing and Exploring Test Results](#)
- [Rerunning Tests](#)
- [Terminating Tests](#)

For the framework-specific testing procedures, refer to the sections:

- [Testing Frameworks](#)
- [Testing ActionScript and Flex Applications](#)
- [Testing PHP Applications](#)
- [Unit Testing JavaScript](#)

See Also

Procedures:

- [Configuring Project Settings](#)
- [Configuring Content Roots](#)
- [PHP-Specific Guidelines](#)

Reference:

- [Run Tool Window](#)
- [Test Runner Tab](#)
