

Time Tracking

File | Settings | Tasks - Time Tracking

Use this page to enable time tracking and configure its settings.

Item	Description
Enable Time Tracking	Select this check box to enable time tracking in the current project. When this check box is selected, the Time Tracking tool window becomes available on the right tool window bar, and on the View Tool Windows menu.
Suspend delay	In this field, enter the "accuracy" of time tracking. If no user activity detected during this time, task is considered <i>suspended</i> .
