

Trace Proxy Server Tab

The tab consists of a toolbar and the console area that shows system information and error messages, information about the status of the *Spy-js* session, the availability of the proxy server, the currently active frames ("workers"), etc.

Trace Proxy Server Toolbar

Item	Tooltip and shortcut	Description
	Stop Trace Proxy Server	Click this button to terminate the currently running process externally by means of the standard shutdown script.
	Up/Down the Stack Trace Ctrl+Alt+Up Ctrl+Alt+Down	Use these buttons to navigate through the stack trace from one reported error to another. These buttons are available only when errors are reported, for example, if the configuration file is corrupted.
	Use Soft Wraps	Click this button to toggle the soft wrap mode of the output.
	Scroll to the end	Click this button to navigate to the bottom of the stack trace and have the cursor jump to the corresponding location in the source code.
	Print	Click this button to send the console text to the default printer.
	Clear All	Click this button to remove all text from the console. This function is also available on the context menu of the console.
