

Using EJB ER Diagram

EJB entity-relationship (ER) diagrams let you view entity beans, and also create and edit relationships between them.

To select elements in an EJB ER diagram

- To select an element, just click it on the diagram.
- To select multiple adjacent elements, keep the **Shift** key pressed, and click the desired elements, or just drag a *lasso* around the elements to be selected.
- To select multiple non-adjacent elements, keep **Ctrl+Shift** pressed and click the desired elements.

To manage the diagram layout

- Right-click the diagram background, and choose **Layout** command in the diagram context menu. Next, select the desired layout from the submenu.
- Use *Drag-and-drop* technique to lay out entities in the diagram manually.
- Restore the last selected layout by clicking  on the diagram toolbar.
