

Using the Web Flow Diagram

Use the Web Flow Diagram for navigating through Struts configuration file `struts-config.xml` and viewing Struts actions, pages, and other elements and interactions among them. The Diagram is coordinated with the **Structure Tree** and **Properties Table** views.

To see the web flow diagram

- Open your Struts configuration file `struts-config.xml` and click **Diagram** at the bottom of the editor window.

The layout of the diagram is common for all [diagrams](#).
