

## Viewing Contents

IntelliJ IDEA makes it possible to view parts of code hidden under the fold markers, or parts of the folder blocks located outside of the editor visible area.

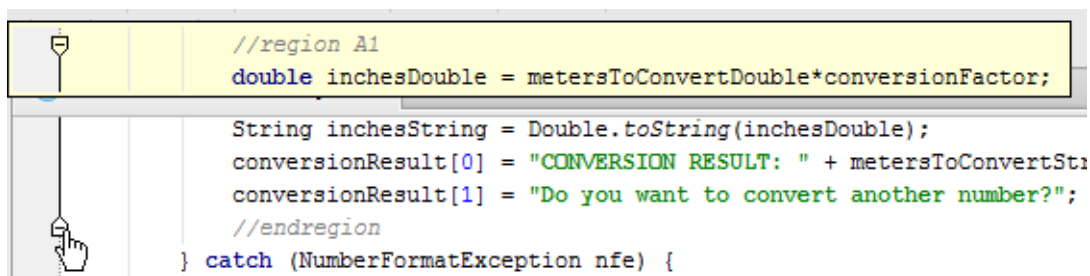

### To view the contents of a folded block

- Hover your mouse pointer over the fold marker, and see the contents in a pop-up window.

### To view the contents of a code block outside of the editor visible area

- Hover your mouse pointer over a lower fold marker, when the upper marker is outside of the editor visible area. IntelliJ IDEA shows contents of a block in a pop-up window:
