

Viewing Definition

Quick Definition Lookup makes it possible to view definition of a symbol (tag, class, method/function, field, etc.) in a pop-up window.

On this page:

- [Viewing definition of a symbol at caret](#)
- [Toolbar of the Quick Definition Lookup](#)

To view definition of a symbol at caret, do one of the following

- On the main menu, choose **View | Quick Definition**.
- Press **Ctrl+Shift+I**.
- Keeping the **Ctrl** key pressed, point with your mouse cursor to the symbol of interest, so that it turns to a hyperlink, with the definition of the symbol displayed in a tooltip. Clicking this hyperlink results in opening the respective definition page in the editor.

- Quick definition tooltip shows hyperlinks to the symbols involved.

- When you move your mouse pointer within the tooltip, a pin button  appears. If you pin the tooltip, documentation for the symbol at caret is displayed in the [Documentation Tool Window](#).

Toolbar of the Quick Definition Lookup

Use the icons on the toolbar of the pop-up window to navigate to the source code of the definition and view its usages.

Icon	Keyboard shortcut	Action
	Shift+Alt+Left Shift+Alt+Right	Navigate to the previous/next screen in the definition pop-up window after using hyperlinks in the definition. <div style="border: 1px solid gray; padding: 5px; margin-top: 10px;">On a OS X computer, you can also use the three-finger right-to-left and left-to-right swipe gestures.</div>

Icon	Keyboard shortcut	Action
	F4	Open the source code of the definition for editing, and close the quick definition lookup window.
	Ctrl+Enter	Open the source code of the definition, and preserve the quick definition lookup window opened.
	Alt+F7	Open the usages of the detected definition across the project in the Find tool window.
