

Viewing Diagram

In this section:

- [Basics](#)
- [Opening diagram](#)

Basics

You can invoke UML class diagram from different places:

- From the various tool windows.
- From the Navigation bar.
- From the Structure tool window.
- From the editor.

IntelliJ IDEA displays UML diagrams in two modes:

- In a pop-up window.
- In a separate editor tab.

Opening diagram

To open a UML class diagram

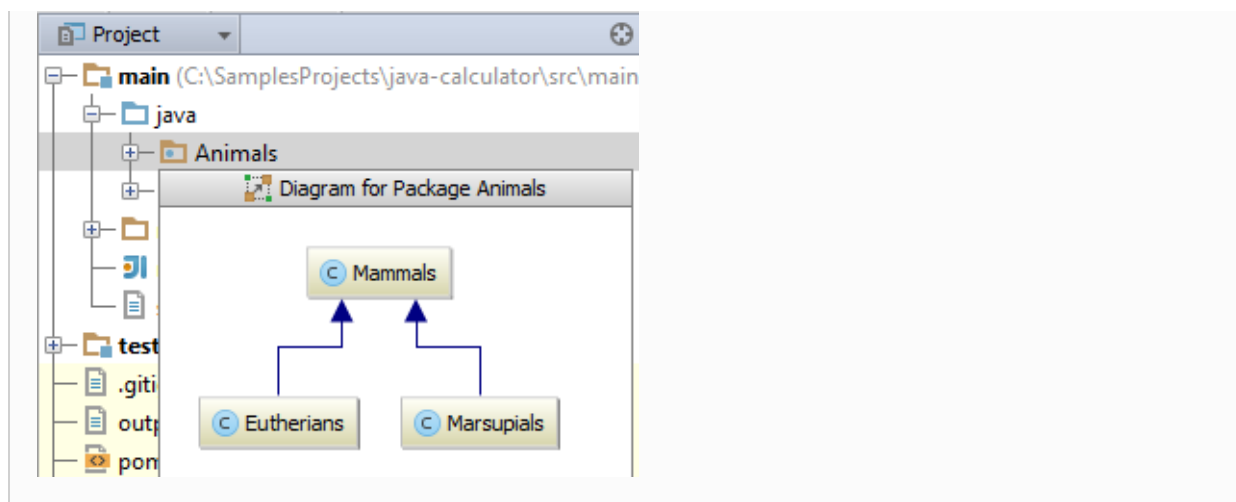

1. Select the desired item, or open it in the editor.
2. Do one of the following:
 - On the context menu of the selection, click **Diagram**, and on the submenu, select the way you want to view the model: **Show Diagram** or **Show Diagram Pop-up**.
 - Press **Ctrl+Shift+Alt+U** or **Ctrl+Alt+U**.

The diagram is displayed in the editor tab or in the pop-up window:

You can open UML class diagram without using your pointing device. Consider such workflow: press **Alt+Home**, then press **Ctrl+Alt+U**.

It is possible to view a UML class diagram of a Java package. Just select a Java package in the Project tool window, and press **Ctrl+Alt+U**:
