

JetBrains AI Service Providers

JetBrains AI Service Providers

Last update: September 29, 2026

JetBrains AI services are powered by a combination of AI models hosted directly on JetBrains servers and AI models provided by external AI services providers (except for JetBrains AI Enterprise, which is powered by a single AI service provider).

1. The JetBrains AI platform currently hosts the following AI models:

Model name	Trained by	Notes
Mellum	JetBrains	Licensed under the Apache License 2.0.
Mellum2	JetBrains	Licensed under the Apache License 2.0.
Qwen3.6-27B	Alibaba Cloud	Licensed under the Apache License 2.0.
Qwen3-Embedding-4B	Alibaba Cloud	Licensed under the Apache License 2.0.
Qwen3-Reranker-0.6B	Alibaba Cloud	Licensed under the Apache License 2.0.

The JetBrains AI platform also hosts other open-source models operated by JetBrains. The models listed in this section run on JetBrains infrastructure; their inputs and outputs are not shared with the parties that trained them.

2. JetBrains AI services use the third-party language model service providers listed below as AI subcontractors. Depending on the service in which you use JetBrains AI, your JetBrains AI configuration, the selected model, and the hosting route, your inputs and data may be processed by one or more of these subcontractors. Not every subcontractor is involved in every request.

Service	AI service provider	Model name(s)
JetBrains AI	OpenAI, Google, AWS, Anthropic, SpaceXAI	GPT-family, Gemini-family, Ama
JetBrains AI Enterprise (powered by JetBrains AI)	OpenAI, Google, AWS, Anthropic, SpaceXAI	GPT-family, Gemini-family, Ama
JetBrains AI Enterprise (powered by OpenAI)	OpenAI	GPT-family
JetBrains AI Enterprise (powered by Google)	Google	Gemini-family
JetBrains AI Enterprise (powered by Anthropic)	Anthropic**	Claude-family
Grazie Extension / Pro	Google	Gemini
Junie	OpenAI, Google, Anthropic, SpaceXAI	GPT-family, Gemini-family, Clau
Air (EAP)	OpenAI, Google, AWS, Anthropic	GPT-family, Gemini-family, Ama
Matter by JetBrains (EAP)	OpenAI, Google, AWS, Anthropic	GPT-family, Gemini-family, Ama
Qure (EAP)	OpenAI, Google, Anthropic	GPT-family, Gemini-family, Clau

\Amazon Bedrock hosts third-party models. The inputs and outputs are not shared with the providers of these models. * Anthropic AI models can be connected to the services either through the Amazon Bedrock service provided by AWS or directly by JetBrains.*
